

Cultural challenges facing the mathematical sciences

Presidential Address from IMA President

Prof. Chris Linton

Deputy VC and Provost Loughborough University

The mathematical sciences ecosystem is a land full of excitement and opportunity. But there is a danger that much of this will be missed if we cling to 20th century priorities and value judgements. As the environment around us evolves, so must we. In this talk I will describe some of those areas where I believe change is most needed and what the consequent benefits might be.

Wednesday 4th October

18:00 hrs to 19:00 hrs — Lecture Theatre F101 A&B, Queens Building

Access via Woodland Road

From 17:30 hrs — Tea and Coffee available

19:00 hrs — Drinks reception

**Hosted by West of England IMA Branch and Department of Engineering Mathematics,
University of Bristol**

No charge is made to attend; non-IMA members are welcome.
