

Higher Education Teaching and Learning Series 2026/27

Data Sharing Statement

To assess proposals fairly, submissions will be reviewed by a panel comprising representatives from the Institute of Mathematics and its Applications (IMA), the London Mathematical Society (LMS) and the Royal Statistical Society (RSS).

As part of the proposal process, you will be asked to provide personal data. The lawful basis for processing this information is contract.

Panel members will only have access to the personal data included in your proposal. Following the panel's decision, the LMS and RSS will not retain any personal data provided through the proposal. However, where a proposer or counter signatory is a member of the LMS or RSS, relevant personal data may be shared with the appropriate society for the purpose of verifying membership.

Financial information provided by successful proposers to enable payment of grant funds will be held by the IMA and will not be shared with the LMS or RSS.

Personal data relating to unsuccessful proposals will be deleted once the assessment process has been completed.

If your proposal is successful, the personal data you have provided will be retained securely by the IMA for a period of six years. This is required for financial record-keeping purposes, and the lawful basis for retaining the data is legal obligation.

For further information, please refer to the privacy notices of the participating societies:
